Tensions ran highest during the first decades of the Cold War, from the mid-1940s to the mid-1960s, when the U.S. and the USSR engaged in a series of proxy wars between the two superpowers continually antagonized each other through political maneuvering, military coalitions, espionage, propaganda, arms buildups, economic aid, and proxy wars between other countries.

One of the most notable examples of proxy wars was the Vietnam War, which was fought between the United States and North Vietnam on the one hand, and South Vietnam and the Viet Cong on the other. The Vietnam War was a major conflict of the Cold War era and resulted in significant loss of life and economic damage to Vietnam.

Another example of a proxy war was the Cuban Missile Crisis, which occurred in October 1962. It was a confrontation between the United States and the Soviet Union over the presence of Soviet nuclear missiles in Cuba. The crisis brought the world to the brink of nuclear war and ultimately resulted in a Soviet withdrawal of the missiles from Cuba.

Other proxy wars of the Cold War era include the Korean War, the Chinese Civil War, the Algerian Civil War, and the Congo Civil War. These conflicts were often fought as part of a larger ideological struggle between the United States and the Soviet Union, with each side seeking to expand its influence and control over the world.

The Vietnam War was particularly significant because it was the first time that the United States had fought a major war in Asia since the Korean War. It also marked the beginning of the end of the American Empire, as the United States withdrew its troops from Vietnam in 1973. The Vietnam War is often cited as one of the most costly and controversial wars in American history.
