

bet 365 palmeiras

On this website, you can play heads-up (two person) no-limit Texas Hold'em. The blinds are 50 and 100 chips and the stack sizes are 200 big blinds (i) Tj T* BT

Slumbot is one of the top no-limit poker bots in the world. The 2024 version of Slumbot placed second in the Annual Computer Poker Competition, the premier event for poker software.

The baseline statistics compare how you did to how Slumbot would have done with your cards in your seat. A positive value for baseline earnings mean you did better than Slumbot would have done against itself given your cards and sitting in your seat.

Here's an example with a single hand. First Slumbot deals out cards for the board (let's say AhTd4c9s3h), the button (let's say AdKh) and the big blind (let's say TsTc). Then Slumbot plays itself on these cards.

Let's say that the players get all-in (since they both have strong hands)

. So the result is -20,000 for the button.

Now you get to play Slumbot on these same cards. Let's suppose you're the button. Perhaps you put in 8,000 chips on the early streets but manage to fold to a large bet on the river. Your outcome is -8,000 for this hand.

Your baseline outcome is how much better (or worse) you did than Slumbot did against itself. Your baseline outcome here is +12,000 which is the difference between -8,000 and -20,000.

Your baseline statistics should better reflect the skill with which you play. They eliminate much of the luck due to getting good or bad cards by measuring your relative performance to another player playing with the same cards.
