

bwin oder tipico

A spread of +3.5 means a team must win outright or lose by fewer than four points to cover the spread. A +2.3 spread is particularly enticing in football because, as noted above, it's subjective and ordered unilaterally. It's important to understand that the spread is not a guarantee of profit. It's simply a bet on the outcome of the game. The potential profit is calculated by taking the amount of money you wagered and multiplying it by the value of the bet (the moneyline odds divided by 100). Put simply: Potential Profit = Wager x (Odds / 100).
