

b^nus bets88

Money Line odds are American odds (For example, if the American odds are +100, that means you would need to bet \$100 to win \$100. If the odds are -100, that means you would need to bet \$100 to win \$100.)

the formula is:

ade-line odds, also known as "money line" odds, are used to represent the probability of a team winning a game.

These odds are calculated based on the probability of a team winning a game. The odds are expressed as a positive or negative number.

For example,

if a team has odds of +100, that means you would need to bet \$100 to win \$100.

If a team has odds of -100, that means you would need to bet \$100 to win \$100.

For live casino and online sports betting,

the maximum return is capped at R1,000,000. And for horse racing, you get RS2252
