Betting on Super Spin Roulette Live

It's important to understand the two main bet types

in Super Spin Roulette. Not least, because one type will get the benefit of the

multipliers and the other type will not.

The two bet types are:

Outside Bets

These are bets placed on the outside of the betting grid. These tend to be the

Even Money bets, like Red/Black, Odd/Even, High/Low and Column Bets and Dozen

bets, which pay 2:1.

Inside Bets

these are individual numbers or combinations of numbers and have normal

payouts of between 35:1 to 5:1. It is these bets that multipliers will be paid on, and

also the bets that have their normal payouts reduced (which pays for the

multiplier).

The outside bets play as they do on a regular European Roulette table, so

there is no harm in playing those bets on the Super Spin table, you will get the same

return. The implications of playing the Inside bets and the impact the multipliers have on the

payouts does need some explanation.

Inside Bets

Straight Up Bet

This is a bet where your chip covers one number on the betting grid. There are thirty-seven numbers to choose from. You can place as many straight-up bets as you like.

The multiplier payout will be for the full amount. Payout = Straight-up Bet amount x

Multiplier.

Split Bet

This is a bet where your chip covers two numbers so half the amount is on one

number and half on the other. You cover two numbers with one bet.

The multiplier payout for a Split bet is half. Payout = Split-Bet amount x multiplier

divided by two.

Street Bet

Your chip covers three numbers across the betting grid. There are 12 rows to

place bets on. The multiplier payout for a Street Bet is a third. Payout = Street Bet

amount x Multiplier divided by three.

Corner/Basket bet

This is a bet where you place your chip on four numbers in a square pattern. The multiplier payout is a quarter. Payout = Corner/Basket bet amount x Multiplier divided by four.

There are also bets on the Super Spin table that have a multiplier. These are the

Even Money bets, like Red/Black, Odd/Even, High/Low and Column Bets and Dozen

bets, which pay 2:1. These bets have a multiplier of 1.0. The multiplier payout for these

bets is 2:1. Payout = Bet amount x Multiplier.

There are also bets on the Super Spin table that have a multiplier. These are the

Even Money bets, like Red/Black, Odd/Even, High/Low and Column Bets and Dozen

bets, which pay 2:1. These bets have a multiplier of 1.0. The multiplier payout for these

bets is 2:1. Payout = Bet amount x Multiplier.

There are also bets on the Super Spin table that have a multiplier. These are the

Even Money bets, like Red/Black, Odd/Even, High/Low and Column Bets and Dozen

bets, which pay 2:1. These bets have a multiplier of 1.0. The multiplier payout for these

bets is 2:1. Payout = Bet amount x Multiplier.
