What Does a +1.5 Spread Mean? A +1.5 spread is commonly seen in baseball

betting, the

standard line for MLB. This spread means the underdog must

win outright or lose by

exactly one run to cover the spread. Alternatively, a -0.05 spread

means that an

underdog must score at least two runs! Who Is Over/Under In Sports

Betting?

Let's explore the concept of a point spread (aka "handicap") and how it

works to level the playing field.

When you bet on an underdog, you need to win by more than the spread. For example, if you bet on a team with a +1.5 spread, they need to win by 2 or more runs to cover the spread.

Divided By 100. Put simply:
