

sport recife fc

To calculate your potential payout on an underdog, all you need to do is multiply your stake (the amount of money it wagers) by the value resulting from the moneyline odds divided by 100. Put simply: Potential profit = Wage x (Odds/100)...

For fractional odds, the equation is $\text{Potential Profit} = \text{Wage} \times \left(\frac{\text{Odds}}{\text{Denominator}} - 1 \right)$
