

roulette guess

It is theoretically possible to use machine learning and artificial intelligence to analyze patterns and predict outcome, in roulette. However, it's important to note that casinos employ various measures to prevent cheating and ensure the randomness of the game. It is possible to use machine learning/artificial intelligence to find weaknesses in the game, but this is a complex task. In fact, the minimum bet is \$5, it means each outcome must be a minimum of \$5. If the minimum bet is \$5, it means the total amount in your bet on the table must be at least \$5 * 6 = \$30.
